GUIDELINES ON EVIDENCING ACADEMIC ACHIEVEMENT

The following guidelines provide examples of the kinds of evidence that might be used to demonstrate academic achievement for the purposes of annual appraisal, continuing appointment and promotion. They are intended only as a guide and do not include every type of achievement possible. Staff members should build profiles that best highlight their achievements within the context of their disciplines.

Evidence is especially helpful when it includes benchmarking comparisons against best practice. There may be some overlap in evidence across the academic activities. Demonstrating innovation and leadership are factors that are commonly taken as evidence of a high standard of achievement within many of the indicators. Growing/clearly established (depending on academic level) leadership may be demonstrated in teaching, scholarship of teaching and learning, research and creative work, service and engagement and clinical practice and innovation. For example Teaching Focused Academics may demonstrate leadership in teaching through innovative and transferable assessment practices. Evidence of these practices being transferred might include e.g. presenting the practices through school forums, leadership of course teams, other presentations or documentation (the last two indicators may also demonstrate Scholarship of Teaching and Learning).

Depending on the type of appointment the application may refer to all or some of the following categories of academic activity: Teaching, Scholarship of Teaching, Research and Creative Work, Service and Engagement with appropriate weightings, and emphasis. For Clinical Academics this work will be largely carried out in a clinical context.

1. Criteria

These guidelines should be read in conjunction with PPL 5:70.17 Criteria for Academic Performance, which set out the criteria and standards against which the performance of the staff member is assessed.

2. Description of activities for academics at the University of Queensland

<table>
<thead>
<tr>
<th>Teaching</th>
<th>Scholarship of teaching and learning</th>
<th>Research and creative work</th>
<th>Service and engagement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Being familiar with the latest developments in one’s discipline.</td>
<td>Developing, practising, evaluating, and communicating improved pedagogies, learning processes, curricula, policies and learning materials.</td>
<td>(i) Undertaking activities that fulfil the HERDC criteria for research. The definition of research is consistent with a broad notion of research and experimental development (R&amp;D) as comprising “creative work undertaken on a systematic basis in order to increase the stock of knowledge, including knowledge of humanity, culture and society, and the use of this stock of knowledge to devise applications”. R&amp;D includes (in addition to pure basic research, strategic basic research, and applied research), experimental development including creative work and performance insofar as they are directly related to original basic and applied research.</td>
<td>Contributing to activities that benefit the organisational unit (School, Faculty, Institute, University). Providing effective leadership in any area of University activity. Providing effective links between the University and the external community, including clinical and professional activities, in particular so that: (i) teaching is fully informed by professional practice;</td>
</tr>
<tr>
<td>Being informed by current ideas for teaching in that discipline.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Undertaking teaching (and associated coordination) in a range of settings appropriate to the discipline.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Supervision of students undertaking postgraduate research or advanced specialty</td>
<td></td>
<td></td>
<td></td>

</table>
programs.
Undertaking reflection, review and continuous improvement of curricula, teaching resources and teaching approaches.
Applying new ideas in the discipline or profession and new ideas about teaching to teaching practice.

Applying these understandings to work that
(i) breaks new ground and is innovative
(ii) can be replicated and elaborated
(iii) is documented and subject to peer review.

For more details on the Scholarship of Teaching and Learning, see http://www.uq.edu.au/tedidev/index.html?page=193998

(ii) Undertaking activities that support research and meet this definition of research including:
- management of staff who are either directly engaged in research or are providing professional, technical or clerical support or assistance to those staff;
- supervision of students undertaking postgraduate research.

(iii) Involvement in technology transfer and commercialisation.

(i) research is fully informed by needs of government and industry;
(ii) students have opportunities to undertake community engagement;
(iv) the standing of the relevant discipline or profession is enhanced locally, nationally or internationally;
(v) the University’s profile is enhanced locally, nationally or internationally.

3. Teaching

Evidence for teaching activity includes:

- amount and scope of teaching (e.g. lecturing, classroom, tutoring, flexible delivery/online, field, work-based, studio, laboratory, workshop)
- amount and scope of clinical teaching in a client/patient setting and/or clinical context
- amount of coordination at the course, major or program level
- amount of supervision of honours and research higher degree students
- amount of teaching, examination and supervision of students within placement programs, and resident, advanced and/or specialty training programs
- extent of development of teaching materials including assessment
- extent of development of curricula at course or program level
- amount and scope of professional development, participation in conferences and other fora and membership of networks (internal and external, such as HERDSA and OLT) related to teaching and learning
- completion of the "Teaching @uq" program
- extent of engagement in peer review on a range of aspects of teaching formal speciality college examination and supervision of advanced clinical and/or specialty trainees
- incorporation of innovative teaching practices and technology

Evidence for teaching quality and impact includes:

- results for independent, University approved teaching evaluations such as TEVALs, iCEVALs SECaT and in the context of the setting (numbers of students, level being taught, etc)
- outcomes for students (employment outcomes, letters or surveys of industry satisfaction on preparation of students for practice, prizes and awards)
- effective response to student feedback and feedback to students on response/outcomes
- reflection, review and continuous improvement of curricula, teaching resources and teaching approaches
- peer review of teaching methods, assessment approaches, course design and improvement and of teaching materials
- unsolicited testimonials from students
- benchmarking of the course or program against similar courses or programs to improve content and delivery
- demonstrated use of evaluation data, peer review and benchmarking to inform teaching
- a clear and reflective philosophy of teaching, evidenced in self-reflective teaching essay
- development of innovative approaches to teaching
- contributions to the development of learning communities amongst students
- effective collaborative teaching approaches and sustained professional, ethical practices in work and teaching contexts
- contributions to teaching students with special needs
- contributions to the development of reliable and valid assessment tools
- impact of such contributions and innovations on the practice of others
- student progression into research degrees
- timely completions and grades of honours and RHD students
- quality of outcomes for Honours, RHD students, advanced and/or speciality training programs students or placement students (class of honours, prizes, student publications and conference presentations, employment outcomes, student progression into academic/research positions)
- contribution to mentoring and peer review of colleagues in teaching and learning
- contribution to tutor training
- recognition of teaching through nomination, commendation/awards for teaching (individual, team, program) or supervision excellence
- ability to guide and advise students and/or trainees in the development of clinical skills, knowledge and attributes – including communication skills and ethical issues
- undertaking clinical teaching that is fully informed by contemporary, evidence-based clinical practice
- provision of appropriate and constructive feedback to students regarding their performance in clinical situations
- demonstrating exemplary clinical practice
- invitations to participate in specialty college or external professional clinical teaching
- leadership in a large interdisciplinary area, field of study or academic program
- leadership in program-level curriculum review and reform
- leadership roles, duration and achievements at a University, faculty, school level such as Chief Examiner, Chair Faculty/School Teaching and Learning Committee, Program Convenor Major Convenors, Academic Advisers, Associate Dean (Academic), Integrity Officer, Year Coordinator
- leadership in mentoring and supporting colleagues in planning and designing learning activities and curriculum
- provision of opportunities for students to engage with key researchers and industry partners (through e.g. guest lecturing, tutoring, student seminars, laboratory and other research and industry-based projects and tasks)
- integration of relevant case studies and industry experiences into teaching
- improvement in student retention

4. Scholarship of Teaching and Learning
(Refer also to: http://www.uq.edu.au/tedidev/index.html?page=193998)

Evidence of activity in scholarship of teaching and learning includes:

- development and dissemination of new and rigorous models for curricula and teaching practice, in classroom, online, practical, clinical settings or other flexible delivery
- participation in practitioner research and case studies of teaching practice
- reflection on and critique of the results of these studies
- identification of implications for future practice, informed by relevant literature
- dissemination of the outcomes of this work:
  - journal articles, published refereed conference presentations,
  - textbooks, book chapters
  - conference and workshop presentations
- conference and workshop organisation
- collaborative relationships within the School/Institution and nationally/internationally in the area of scholarship of teaching and learning
- applications for funding (internal, external) for projects and programs in Scholarship of Teaching and Learning and teaching fellowships
- contribution to professional development workshops on teaching and learning
• scholarship of teaching and learning journal reviewing
• participation in scholarship of teaching and learning related organisations

Evidence of quality and impact in scholarship of teaching and learning includes:

• impact of contributions and innovations on the practice of others (within the institution, nationally/internationally)
• quality of journals in which work is published: quality/structure of editorial board and refereeing process, rejection rate and citation impact factor of journals
• competitiveness of granting agencies from whom funding and teaching fellowships have been obtained (HERDSA, HEA)
• invitations: keynote addresses, seminars and workshops at other universities and at conferences, serving on external high level selection committees, visiting appointments at other institutions
• external expert peer review of unit/course materials/curriculum/initiatives
• leadership of major scholarship of teaching and learning projects
• significance of scholarship of teaching and learning collaborations: interdisciplinary initiatives; major international collaborations and other partnerships
• invitations to produce textbooks or other teaching material
• teaching materials adopted elsewhere
• citation of work
• mentoring of colleagues or students in their scholarship of teaching and learning initiatives
• contributions to workshops and the professional development of others in scholarship of teaching and learning
• development of policy, practices and strategies that support high quality teaching and student learning adopted by others within and external to the University
• involvement in accreditation panels
• TEQSA, OLT recognition as an assessor or expert
• awards, prizes and citations for work in scholarship of teaching and learning
• commissioned or invited report on SoTL
• commissioned training activity on SoTL
• media commentary on SoTL

5. Research and Creative Work

Evidence for research and creative work activity includes:

• publications: journal publications, books, chapters, monographs, published refereed conference papers, edited books, special journal issues
• original compositions, works of art or design, performances, creative writing, exhibitions
• scholarly translations
• encyclopaedia entries
• patents and other intellectual property
• technical and commissioned reports
• conference presentations and organisation
• research grants held (present, past, amount of funding)
• research grants applied for¹
• research collaborations and contracts (with industry, government, community etc)
• leadership and project management in major projects
• editorial and industry board memberships and book series editorships
• reviewing activity: articles, grants (eg ARC, NHMRC), theses
• clinical case reports, case reviews and letters to clinical journals
• clinical trial participation as an investigator or clinical expert
• substantive innovation in clinical practice
- innovation in a clinical context (eg development of clinical techniques, outstanding designs/patents, evidence based clinical practice approaches within a profession, high impact clinical process improvement), including evidence of dissemination and adoption

Evidence for research and creative work quality includes:

(Quality refers to the intrinsic merit and academic impact of your research. Quality includes the recognition of the originality of your research by academic peers and the contribution of your research to the discipline)

- quality of journals in which work is published: quality/structure of editorial board and refereeing process, rejection rate, impact factors of journals and discipline-specific journal rankings
- book contracts and stature of book publishers or series editors by whom work is published
- invitations to compose encyclopaedia entries
- scholarly impact of your publications: citation counts of publications – RCI (citations relative to field of research and number of years since publication are more meaningful than raw counts); ‘h-index’, etc
- independent reviews of publications and creative work
- competitiveness of granting agencies from whom funding has been obtained, level of contribution to grant and funding amount
- significance of research collaborations: interdisciplinary initiatives; major international collaborations; quality/profile of collaborators
- leadership of research-related professional associations
- invitations: keynote addresses; displays of work, curatorial invitation, invited symposia, seminars at other universities; serving on external high level selection committees, visiting appointments held at other institutions
- postdoctoral fellows attracted
- awards: international awards and fellowships, national awards from academies and learned societies, University of Queensland awards (early career, research excellence award etc)
- invitations to become a Fellow from academies and learned societies
- achievement of specialist clinical qualifications (e.g. fellowship of professional colleges) achieved by examination or election
- panel memberships (ARC, NHMRC, etc)
- membership of Statutory Committees; government advisory committees
- registration of clinical trial and publication of outcomes

Evidence for research and creative work impact includes:

(Impact refers to the uptake of your research beyond the academic discipline, and the broader social, economic, environmental and/or cultural benefits resulting from your research)

- the extent of commercialisation of research: patents, royalty licences, spin-off companies, successful technology transfer activities
- significance of research collaborations: major industry, government, profession, business, not-for-profit organisations and community partnerships
- community or government adoption of work and development of policy from work
- awards: industry, government and community awards and prizes, national awards from professional associations
- demonstrated engagement with end-users of your research, including community, industry and government groups (eg media comment, series of public lectures, outreach initiatives etc)
- provision of expert advice, technical reports and consultancy services to community, industry, government and other groups
- extent of sales of research commercialisation, books and major library holdings
- panel memberships (government advisory committees and task forces, etc)
- invitations to judge events and competitions relevant to research/creative field
- translation into clinical trials and practice, impact of clinical innovation and/or clinical trial outcomes on clinical practice, commercial investment, patents etc
leadership of major funding initiatives or research and development projects for example: Hospital redevelopment, establishment of research facilities

- evidence of a significant facilitatory role in encouraging and leading research or scholarship within the clinical environment

¹For information regarding Australian and International competitive grants see http://www.uq.edu.au/research/research-management/about-applying

²The Web of Knowledge includes the Science Citation Index and the Social Sciences Citation Index for raw citation counts of ISI indexed publications, Journal Citation Reports for Impact Factors of journals, and Essential Science Indicators to allow discipline-specific benchmarking against international citation data. The Scopus and Google Scholar databases can also be used to provide raw citation counts of publications. Both the Scopus database and ISI Web of Knowledge are accessible through the UQ Library.

6. Service and Engagement

Internal service includes service to the University community and external service includes service to the profession, government, industry and community and for which you were not personally paid.

Evidence for service and engagement activity:

- to the School/Centre/Institute/Faculty through for example: membership of Committees, Boards; contributions to student advising, recruitment activity, mentoring and supervision of staff, management of research facilities
- to the University through for example: membership of University Committees, Academic Board or Senate
- to the Profession/Discipline through for example: chairing/presidency or membership of boards, colleges or registration boards or professional/discipline associations editorship/membership of editorial boards of journals; significant organisational contribution to national/international conferences or workshops; continuing professional education; reviewing papers or grants
- provision of expertise to organisations, including government and industry through for example: membership/chairing of government, industry or community boards, committees, reference groups or commissions; advisory work for local, national and international organisations; leadership in clinical or hospital administration; leadership of clinical groups within a hospital, health service district or at a national or international level
- to the wider community through for example: media comment, community education (e.g. public lectures), expert witness work, performances, Schools liaison, curatorship for exhibitions, museums and collections, external invitations to judge mooting competitions
- clinical and other specialist services, including management of clinical case load
- undertaking clinical innovation and its dissemination to the profession and community
- leadership in clinical or hospital administration; leadership of clinical groups within a hospital, health service district, clinical network, industry or service including at a national or international level
- undertaking innovation and commercialisation activities such as seeking venture and other funding for intellectual property protection and development, and providing advice and services to startup companies
- amount and scope of professional development related to service and engagement
- engagement with foundations, philanthropists and alumni
- outstanding contribution to the University’s work with community and alumni engagement
- high level leadership role for example: Senior Executive in a teaching hospital or health service or chief medical officer of state or federal government or president of relevant specialist college
- eminent and pre-eminent status for Medical Officers awarded by Department of Health QLD (peer review process)
- contribute to the strategic advancement of the University eg fostering strategic partnership between the University and industry/government and other stakeholders that delivers ongoing benefits to the University, philanthropic contributions
Evidence for service and engagement quality and impact

- impact on internal or external organisational policy
- invitations to provide expert comment or consultation from auspicious community and professional bodies, significant media commentary
- requests for specialist advice to other clinical practitioners especially external to place of practice, provision of technical advice/assistance in legal cases
- standing of publisher/journal for which reviewing or editing activity takes place
- standing of granting bodies where reviewing activity takes place, for example ARC College of Experts
- leadership roles on professional bodies and standing for example local/national or international
- awards/prizes recognising service at any level
- leadership and innovation in the development of new clinical procedures/techniques and extent of adoption by the profession
- leadership in innovation and commercial development of university IP; or demonstrated outcomes of commercialisation
- audit and/or other evidence of involvement in quality clinical services
- leadership in the establishment of a new clinical program/administrative leadership of relevant clinical groups
- invitations to provide professional development to clinicians
- significant contribution to the formulation of government policy or professional practice standards at national or international level
- recognised expert in health service improvement eg: National or State Health Service Investigator or Health service reviewer, leading commissions into health services or medical practice

7. Further Information
Policies, guidelines and forms relating to academic promotion, mid-term and final review for continuing appointment, enhanced and annual appraisal may be accessed through the Performance review and management webpage (https://staff.uq.edu.au/information-and-services/human-resources/performance-review)

HR Services - Guidelines on Evidencing Academic Achievement (29 March 2018)
